WHY WE GET HIRED

We are not design primadonnas.

We are hands-on, realistic problem solvers who happen to be good listeners and creative with concepts and budgets. We know not everyone has money to burn, but almost everyone wants a pleasant working environment—after all, we spend most of our life in our offices.

We like making our clients happy. Our goal is helping you realize your vision, not to get published. We enjoy building relationships that endure and we plan on being around for your lease renewal.

Our firm thrives on referrals and repeat business. People who work with us, want to work with us again.

BETH MILLER, PRINCIPAL

Beth has over 22 years experience in commercial interiors. Her broad knowledge and competency, combined with big picture common sense, provides consistent and innovative solutions. She has built strong relationships with many clients, brokers and contractors who bring repeat business to the firm because of their positive experiences. Problem solving, dealing successfully with budget constraints, providing effective communication and high quality design on schedule, set Miller Design apart.

Beth is a hands-on space planner, designer and project manager. She is an active part of every project, fostering communication and teamwork among contractors, consultants and clients. Miller Design's success is measured in the satisfaction of happy clients and good-looking projects.
